MOVIMENTAZIONE E STRUMENTI CONSIGLIATI SUL CANTIERE

HANDLING AND RECOMMENDED TOOLS ON SITE

Le casse (o cavalletti) devono essere inforcate dal lato lungo con le forche da 2,5 mt. Le Lastre devono essere movimentate in verticale e nel caso di ponti l'imbragatura deve essere fatta con corde di canapa (sconsigliate catene di acciaio) per evitare rotture e/o sbeccature. In caso di stoccaggio su cavalletti di metallo questi devono essere rivestiti (legno o gomma).

Cases (or stands) must be lifted from the long side by placing 2.5 m long forks under them. Slabs must be vertically handled and, in case of bridges, the slinging must be made using hemp cloth (steel chains are not recommended) to prevent any breakage and/or chipping. In case of storage on metal stands, the latter should be coated (wood or rubber).

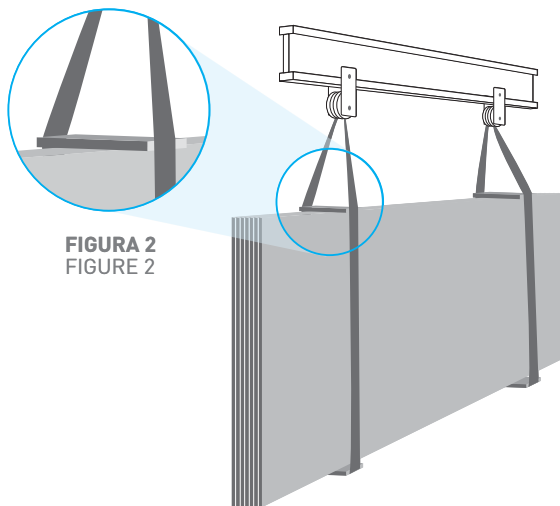

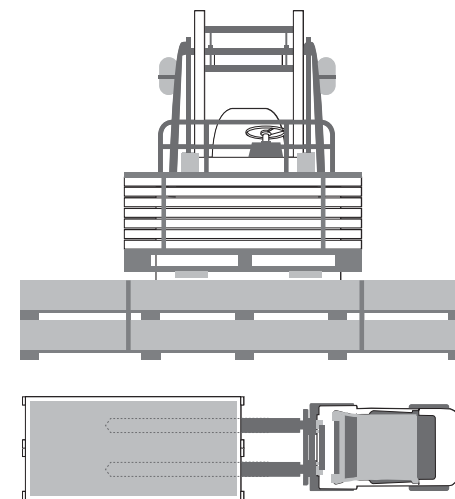

FIGURA 2
FIGURE 2

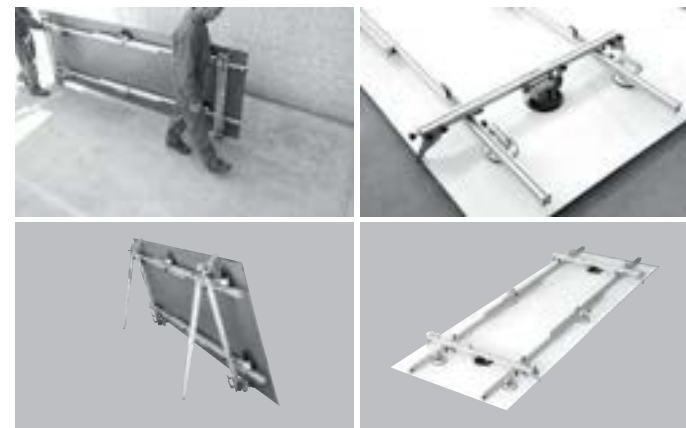

Per prese multiple si consiglia di utilizzare un bilancino e delle cinghie in tela distanziate sul fondo e sulla parte superiore da uno spessore in legno di lunghezza leggermente superiore al pacco lastre (come mostrato in figura 2). In questo modo la tensione esercitata durante la movimentazione non grava sulle lastre evitando rotture del materiale

Attenzione: verificare sempre la portata massima di carico.

For multiple grabs, the use of a lifting beam is advised, with canvas straps spaced out on the base and on the top by a wooden spacer slightly longer than the slab pack (as shown in figure 2). In this way the tension generated during handling is no applied to the slabs, avoiding the breakage of the material.
Warning: always check the maximum load.

NON SOVRAPPORRE MAI VOLUMI DIVERSI, PER EVITARE ROTTURE
TO AVOID BREAKAGE, NEVER STACK DIFFERENT VOLUMES

Per la movimentazione è consigliato utilizzare i kit in alluminio appositamente studiati per le lastre. I kit, dotati di ventose, limitano le torsioni e consentono il trasposto sia manuale (sempre in verticale) che su carrello. Per la movimentazione manuale sono necessarie 4 persone, movimentando in verticale dal lato lungo.

Use of the aluminium kits specially designed for the slabs is recommended for handling. The kits, with suckers, limit torsion and permit transport (always vertical) both manually and on forklift. 4 people are required for manual handling, handling vertically from the long side.

PULIZIA, MANTENIMENTO E CURA

CLEANING, MAINTENANCE AND CARE

Per la pulizia quotidiana è consigliata acqua tiepida ed eventualmente un detergente di uso quotidiano, per sporchi più intensi sono consigliati:

- **Acido:** detersivi acidi, disincrostanti, rimuovi cemento es. Viakal.
- **Alcalino:** detergente basico, ammoniaca, sgrassante es. Chante Clair, Cif.
- **Solvente:** solvente universale, diluente, acquaragia, alcol
- **Ossidante:** candeggina, acqua ossigenata.

Dopo l'utilizzo sciacquare sempre abbondantemente con acqua.

For daily cleaning, lukewarm water and possibly a household detergent are recommended. The following are recommended for heavier dirt:

- Acid: acid detergents, de-fouling cleaners, cement remover e.g. Viakal.
- Alkali: basic, ammonia, degreasing detergent e.g. Chante Clair, Cif.
- Solvent: universal solvent, thinner, turpentine, white spirit, alcohol
- Oxidant: bleach, hydrogen peroxide.

After use, always rinse well with plenty of water.

GUIDA ALLA RIPARAZIONE:
Riparare piccolissime sbecature è possibile. Le mani esperte possono ripristinare piccolissime sbecature con delle resine epossidiche anche se non è semplice trovare i giusti toni e ripristinare la superficie originale. Una volta riparata la sbecatura, rimuovere la resina in eccesso con un panno imbevuto di acetone prima che indurisca. Una volta indurita lavorare la resina manualmente per omogenizzarla alla superficie.

GUIDE TO REPAIR:
Very small chipping can be repaired. Expert hands can restore very small chipping with epoxy resins, even though it is not easy to find the right tones and restore the original surface. Once the chipping is repaired, remove the excess resin with a cloth soaked in acetone before it hardens. Once it has hardened, work the resin by hand to make the surface uniform.
