TERZANI
LA LUCE PENSATA

New Collection Preview

Terzani's new collection of lighting designs rethinks traditional luxury, pushing precious materials to new limits. We are proud to present three new designs during EuroLucce 2017. Continuing to expand our collection of cutting-edge, luxurious lighting, these newest additions to our PreciousDesign collections take crystal and metal to new limits. The collection also showcases the next generation of Terzani collaborators, with new pieces from youthful designers: Franziska Hinze, the duo Stefano Papi & Saviz Yaghmai, includes new work from Dodo Arslan and Nicolas Terzani.

At Terzani, we are continuing to adapt the expertise we've honed over 40 years to push traditional materials as far as our imaginations and technology allow. As our business has continued to expand globally, our clients, whether contract or private, have turned to us to help them translate luxury for the next generation. We feel that this latest collection is the next step in this translation, and represents the enduring tradition of Italian craftsmanship and design.

Manta

design Dodo Arslan & Nicolas Terzani

Manta, Shimmering *Waves*.

Manta is the latest design featuring the distinctive lead crystal first unveiled in Nicolas Terzani's best-selling Mizu. Collaborating with designer Dodo Arslan, the two imaginative minds created a light featuring sinuous, undulating lines. The results are soft waves of crystal light reminiscent of being underwater. The innovative Manta is made of 24% lead crystal, with a dimmable integrated LED lamp focused on maximizing the crystal's reflection. Manta's organic form is available in three sizes (Ø 20cm-7.9", Ø 26cm-10.2", Ø 32cm-12.6") and can be installed in numerous, customizable arrangements.

Kika, Get *Dressed Up*.

The glamour and allure of the Golden Age of Hollywood drove the inspiration for Terzani's newest pendant, Kika. Incorporating modern technology with new materials, designer Franziska Hinze created a contemporary fixture reflecting this exciting period in cinema. Balancing proportions was also part of the inspiration behind Kika's shape. The light is made of hundreds of photo-etched metal pendants, attached meticulously by hand to metal rings. The final result is similar to that of a fine jewel, floating in the air, and shining in every direction. To enhance the contrast of light, Terzani offers Kika in different color and size variations. Kika's design is well suited to Terzani's luxurious style and proficiency with metal. It is a unique piece that adds vibrancy with a shimmering, suspended light.

PreciousDesign

Terzani's Precious Design Concept is luxury evolved. Each piece in this new lighting collection breaks the staid boundaries of traditional luxury, and incorporates stunningly modern design, cutting-edge technology, artisan craftsmanship and precious materials. The result are sculptures of light whose illumination transforms spaces through dynamic lighting and shadow effects. They create a new visual language of what luxury is, one that reflects both today's aesthetics, architecture and design traditions yet also pushes towards the future.

a Wealth
of Light.

Design Jean-François Crochet

preciousdesign 67

A dark, ornate dining room with a round table, chairs, and a chandelier made of falling angel figurines. The room features dark wood paneling with intricate carvings and a central fireplace. The chandelier is a large, multi-tiered piece made of numerous small, silver, angel-like figurines suspended by thin wires, creating a 'falling' effect. The lighting is dramatic, highlighting the textures of the wood and the metallic sheen of the chandelier.
